

Corporate Strategy

To be a consistently profitable and competitive company, by employing lean manufacturing practices, sound global supply chain management strategies, and execute fair pricing techniques in our quoting process; To develop and maintain world class core competencies in precision machined ceramic, metal and plastic components; To broaden and balance our customer base in order to remain stable during various industry cycles; To maintain a high level of compliance to internal and external requirements; To produce precision machined parts and assemblies that meet or exceed our customer's needs and expectations; To continually improve our overall business and manufacturing process effectiveness and efficiencies.

KNT Manufacturing is a World Class Manufacturer of Precision Machined Components. We reside in a 130,000 sq.ft. factory equipped with over 120 state-of-the-art CNC Machines, premium welding services, and a Zeiss centered CMM Inspection Laboratory.

ISO 9001:2015 CERTIFIED

As an ISO9001:2015 Certified Company, Our goal is to achieve complete Customer Satisfaction.

Quality is Top Priority

Our Quality Management System will ensure effective Product Realization activities and proper Quality Control processes to continuously improve our production yield and product quality.

Commitment

KNT employs over 400 skilled employees committed to continuous improvement and customer satisfaction. We employ a full-time Engineering Staff for Prototype, Design, and Manufacturing activities to ensure, Critical to Quality Customer requirements are understood and disseminated throughout the organization!

Our Vision

KNT's work force is committed to consistently providing quality products and services, which exceeds Customer expectations and requirements in areas of Quality, Competitive Pricing, Customer Service, and On-Time Delivery.

Key Offerings

Team of expert CNC programmers and engineers that ensure custom parts are machined with the best possible product results. Backing the team is state-of-the-art Computer software and equipment programs. Our premium welding services are capable of handling any job, providing our customers with decades of welding experience, resulting in quality product that meet their needs and our short turnaround times has made us machining leaders in the industry. Our Rapid R&D Department is just another area of expertise and service we offer. Free local pick-up and delivery! Just one of the perks of being a KNT customer.

A FEW FACTS ABOUT KNT

Our 120+ CNC machines include: “palletized FMS systems”, 4th and 5th axis systems with up to 59 inch machining capability. We are capable of manufacturing large chamber type parts supporting the semiconductor, medical device and other industries. We employ efficient quick turn prototype engineering services; as well as volume production.

Supporting activities include: Blanchard grinding, Value-added Assembly, Welding, Cleanroom, Leak/electrical testing, full service Quality Control inspection with precision CMM capabilities.
